DETAILED ACTION

Allowable Subject Matter

Claims 1-28 and 30-37 are allowed over prior art.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1-9, 19-20 and 32-37, the prior art fails to teach an x-ray generating apparatus having an emitter formed on a first semiconductor structure to emit electrons and the electrons travel in a path in a space between the first semiconductor structure and a second semiconductor structure which ^{is} spaced apart from the first semiconductor structure as claimed in independent claims 1 and 32.

Regarding claims 10-18 and 30-31, the prior art fails to teach an x-ray generating apparatus having an electron emitter and an electron accelerator, wherein both the emitter and accelerator are formed on a semiconductor structure as claimed in independent claims 10 and 30.

Regarding claims 21-25, the prior art fails to teach a method of generating x-rays by activating an emitter on a first semiconductor structure to emit electrons and directing the electrons along a path between the first semiconductor structure and a second semiconductor structure onto a target to cause the target to generate x-rays as claimed in independent claim 21.

Regarding claim 26-28, the prior art fails to teach a method of generating x-rays by activating an emitter on a semiconductor structure and accelerating the electrons traveling in a path by an accelerator formed on the semiconductor structure as claimed in independent claim 26.
